

# Dr. Adeolu Adeboye, MD, FACS

*Excellence in Medicine. Purpose in Service. Impact Beyond Borders.*

For Dr. Adeolu Adeboye, medicine has always been more than a profession. It is a calling rooted in faith, a commitment to excellence, and a desire to make a lasting difference in the lives of others.

Originally from Nigeria, Dr. Adeboye pursued his medical journey in the United States. He earned his undergraduate degree in Neurobiology from Cornell University and his medical degree from the Frank H. Netter MD School of Medicine at Quinnipiac University. He completed his General Surgery residency at Guthrie Robert Packer Hospital, followed by fellowship training in Trauma and Surgical Critical Care at the University of Pennsylvania.

Today, he is a trauma surgeon and surgical intensivist at HCA Florida Bayonet Point Hospital, where he also serves as Associate Program Director of the General Surgery Residency Program. He is board-certified in General Surgery and Surgical Critical Care and is a Fellow of the American College of Surgeons. As an educator, he is deeply involved in teaching and mentoring the next generation of surgeons. He believes that excellence in surgery is reflected not only in the care we provide today, but also in the knowledge, skills, and values we pass on to those who follow.

That same conviction drives his writing. He is the author of *Surgical Mastery: The High-Yield ABSITE & Written Board Review* and *Surgical Critical Care: From Physiology to Practice*, written to make complex surgical knowledge clearer and more accessible to residents and clinicians. His forthcoming book, *Grace Revealed*, explores the richness of God's grace and what it means for everyday life. He also speaks on leadership, purpose, global health, medical education, faith, and resilience.

In 2024, Dr. Adeboye and his wife, Abiodun Adeboye, founded Shekinah Global Healthcare Foundation to expand access to free medical and surgical care for underserved communities in Nigeria. Working alongside dedicated healthcare professionals, volunteers, and partner organizations, including Pro-Health International and Pistis Foundation, the foundation has participated in collaborative medical missions that have collectively reached more than 12,000 patients and beneficiaries and delivered over 780 surgical procedures. These efforts reflect his belief that partnership is what makes lasting impact possible.

For Dr. Adeboye, surgery, teaching, writing, and service are not separate pursuits. They are different expressions of the same calling, grounded in the belief that the opportunities we are given carry a

responsibility to make a difference in the lives of others.
